### About

A calm, purist, proactive, adaptable and reactive software specialist and architect having 20+ years' experience on;

- Software Crafting • Information Architecture • Database Design & Development • Data Management & Analytics
  - Business Process Implementation, Integration and SOA • BPM, Operational Excellence and Digital Transformation
  - Team Leadership • Project Management
- 
- 5+ years as a technical lead and software architect with strong communication and management skills
  - 15+ years as a software developer with strong design, implementation and development skills
  - 4+ years of experience implementing and maintaining complex, distributed and scalable systems.
  - Excellent knowledge of modern system architectures like; serverless, microservices, n-layer, event driven and monolithic.
  - 10+ years of agile development using scrum methodologies
  - Strong project development experience with proven ability to craft projects across international locations and languages.
  - Designing and delivering code with automated testing & performance.
  - Producing meaningful unit-tests, documentation and configuration to support all code developed.
  - Developing highly complex business applications, working across the full development lifecycle from analyzing requirements, determining objectives, designing methodologies, managing resources/timelines through to delivery.
  - Working closely with product owners, QA, operations and other teams in an agile environment to collaborate and develop new software solutions.
  - Ability to work with people of diverse cultures.

### Experience

• Software Development Specialist	ArbiMed	Jul 2018 – Present	3 years 1 month
• Software Development Specialist	Teknoritma Yazılım Hizmetleri	Sep 2012 – Jul 2018	5 years 11 months
• Software Engineer	Reysaş	Jun 2007 – Aug 2012	5 years 3 months

### Education

• Bachelor of Science (BS), Computer Software Engineering	Çankaya University	2002 – 2006
• Bachelor's degree, Management Information Systems	Anadolu University	2018 – 2021

## Skills

### Highlights

- Software Engineering • Information Architecture • Database Design • Technical Leadership

### Programming Languages

- C# • JavaScript • Java • C++ • Scala • Go • Rust

### Industry Knowledge

- Software Architecture • Enterprise Architecture • Distributed Architecture
- Object-Oriented Programming (OOP) • Domain-Driven Design (DDD) • Test-Driven Design (TDD)
- Aspect Oriented Programming (AOP) • Design Patterns • Agile Methodologies • Data Analysis

### Tools & Technologies & Techniques

- .NET 5 • .NET Core • .NET MVC • ASP.NET Web API • REST • WPF • WinForms
- MSSQL Server • PostgreSQL • MongoDB • Elasticsearch • Redis • Azure Cosmos DB • AWS DynamoDB
- Azure DevOps • AWS Lambda • Serverless Computing • RabbitMQ • Apache Kafka • Docker
- TypeScript • React.js • Angular • Vue.js
- SaaS • BaaS • Automated Workflow • Digital Transformation • Process Reengineering

## Licenses & Certifications

- Microsoft MCSD: App Builder
- Microsoft MCSA: SQL 2016 Database Development
- Microsoft MCSA: Web Applications
- TS ISO/IEC 15504 SPICE

## Interests and Hobbies

### Interests

- Greek Philosophy (Presocratic) • Intellectuality and Aristocracy • Discussion Culture • Scientific Methods and Logic

### Hobbies

- Three-cushion billiards • Degustation, brewing • Warhammer 40K • Tower Defense

### Unsocial Groups

- Information Security Community • Software Architect Network • Design Patterns & Architecture
- C# Developers & Architects • Scala Enthusiasts • Go Developer Community • Rust Lang Developer Community
